

## LOSS OF LIFE IN EXPLOSION ON U.S. WARSHIP

San Pedro, California.—Three officers and 41 men of the battleship Mississippi were swept to death on the San Clemente steel drill grounds, on that ship, when a shell in one of the 14-in. guns of the ship's number two turret exploded, propelling a shell into semi-official information given to the U.S.S. New Mexico, flagship of division four of the fleet. Nearly a score or more were injured by the flare-back that carried the terrific charge through the breach of the gun, instead of out through the muzzle.

The gun crew were preparing to fire as one unit, as the great sea turret's powerful breech, when a salvo caught for the electricity to be turned for the charge. The switch was thrown on to ignite the shell before the breech was locked, and in another moment the interior of the turret was littered with dead and dying.

Ensign H. D. Smith, from the U.S.S. New Mexico, was the first man to enter the turret number two following the explosion.

Upon entering the turret, Ensign Smith took with him an air hose, which immediately caused flames from the burning debris to be blown away. After fanning the turret with water, Ensign Smith was able to enter. All the men were dead at that time, their faces swelled and their bodies almost beyond recognition by the intense heat. Identification marks on the clothing, however, were still visible.

Three-quarters of an hour elapsed after the fire in turret number two was observed from the quartermaster's deck before anyone entered the hot chamber containing the charred bodies of the entombed men could be made by Ensign Smith.

## Church Union Bill

Contentious Question Is Again Before the House of Commons

Ottawa.—The bill for provision for union of the Presbyterian, Methodist and Congregational Churches has now been reported by the private bill committee, and is again before the House of Commons. The bill has been amended in a number of particulars, but the change which caused most debate was that which provides that no fee shall not come into operation until and unless the general assembly of the Presbyterian church in Canada had authority to agree to it, and that the bill is not to be brought into operation until the general assembly of the Presbyterian church in Canada had authority to agree to it, and that the bill is not to be brought into operation until the general assembly of the Presbyterian church in Canada had authority to agree to it.

## Woolen Mill For Alberta

Negotiations Under Way For Erection of a Mill Near Edmonton

Edmonton.—Wabassan, a summer resort town about 60 miles west of Edmonton, may have what is believed to be the first woolen mill in Western Canada. According to reports received here, negotiations are under way at present for erection of the mill. A group of Alberta business men and sheep breeders have formed a company called the Frontier's Woolen Mills, Company, Ltd. The company already has purchased about 80 acres of land, it is reported.

Construction will start soon, it is said, and the promoters hope to have the mill in operation by this fall.

Trial of Chicago Youths on Aug. 4

Chicago.—Before an impecunious crowd that broke a camp of 100,000 men from his hinges in an effort to see the confessed kidnapers and slayers of 14-year-old Robert Franks, Nathan Leopold, Jr., and Richard Loeb, indicted on charges of kidnaping for ransom and murder, August 4 was fixed as the date of their trial.

The youths, handcuffed, each answered, "not guilty, etc." to each of the indictments, their only part in the proceedings.

## PAIN

## Would Make War Too Terrible to Contemplate

London.—Another invention designed to make war too terrible to contemplate was given a test here by Ernest Wehr, designer. The new war machine is a winged incendiary rocket, which, when fired from the air, will burst into a rain of molten metal, covering an area of from five to eight miles, destroying aeroplanes or anything within its range.

## Manitoba System Is Acquired By U.G.C.

Government Has Alternative Offers for Investors Under Contemplation

Winnipeg.—The United Grain Growers, Limited, present lessees of the 122 Manitoba Government elevators, was again successful in acquiring control of the system when tenders were opened before Hon. Arthur Meakin, provincial secretary.

Two propositions were placed before the government, an offer to either purchase the entire system on a rental basis of eight per cent. per annum on the 1923 appraised value of \$92,000, or the alternative purchase of 41 elevators and control of the remaining 79. The first offer will involve a rental value of \$14,688. Officials decline to disclose the details of the remaining 79. The government is considering both propositions and after expert appraisal of the value of the elevators sought by purchase, a final decision will be given to the company.

## CLAIM MADE OF EXCESS PROFITS BY ELEVATORS

Ottawa.—Legislation to "curb" terminal elevators was introduced in the House of Commons by O. R. Gould, Progressive member for Assiniboia. Gould complained that the terminal elevators at Port Arthur were making excess profits.

The discussion arose while trade union committee members were under review. The board of grain committee members came in for considerable rebuke from the committee, and the Winnipeg delegation of the commission, Robert McEwen (Progressive, Brandon), said that in the crop year 1917-18, forty-eight different grades of wheat had been shown as going into a Port Arthur elevator, while only five had come out. "I hope," said Hon. T. A. Low, minister of trade and commerce, in reply, "to work out some plan that will remedy the evils complained of."

On an item of \$1,100,000 for the year 1917-18, the committee members asked the administration of the Vancouver harbor commissioners, and their colleagues, to be given a surplus of \$100,000. To this, Mr. Low replied that he would be very glad to recommend such a reduction as he felt satisfied that there would be a surplus next year. He pointed out that the result of 14 years' operation was a surplus of \$100,000.

Mr. Cote remarked that the minister of agriculture inspected apples, butter, eggs and other things free of charge. Why should there be a charge for grain inspection?

Mr. Low replied that the western farmers had the benefit of using government elevators at different points in the prairie provinces. The capital expenditure on these elevators was borne by the government, without any cost to the farmer.

Two workers were killed and several policemen seriously wounded in a labor riot at Kingston, Jamaica. The rioters burned the police patrol car.

## Famous French Flier

French ace, who plans competing in America this autumn for the Pulitzer prize, and who has now experienced with a plane which he claims is the fastest ever made, being rated at 280 miles per hour.

## New York Jewelers Sustain Heavy Loss

Customs Truck Robbed of 27 Packages Of Precious Stones

New York.—Ten armed bandits held up a United States customs truck, knocked the driver unconscious and escaped with 27 packages of precious stones which were being transferred from the general postoffice to the appraiser's store. One unofficial estimate placed the loss at \$500,000.

The hold-up occurred on the corner of 12th and Eighth Avenue. As the driver of the truck turned the corner he was crowded against the curb and a taxi-cab from which four men alighted. Six other men thereupon leaped from a sedan parked along the curb and, joining the rest, jumped upon the truck.

When the driver resisted he was struck on the head and outstayed. The bandits gathered up the packages, hoisted them into the sedan and hurried to their two marauders. They picked up Edward Fay, the truck driver, and bundled him into the taxi. At the corner of 18th Street and Broadway, the truck was abandoned and the bandits hurried to the car and hurried.

The gems were consigned to Tiffany and Company and other prominent New York jewelers.

## Aptitudes Are Jeered

Port William, Ont.—Three leaders of the organized body of unemployed in the city of Port Arthur have been thrown into jail, following fiery outbursts at a mass meeting of the men where speakers advocating overthrow of the municipal government aroused the passions of the men. Curses were heaped upon the Federal Government for its insurrection policy and a salute was given to the cause of the I.W.O.

## MR. WRIGLEY'S COUNTRYMEN

(From London Opinion.)

New York.—Miss Margaret Green, daughter of the late Mr. and Mrs. James O. Green, New York, became the bride of Prince Vique, of Denmark, on June 16. The Prince, by marrying a member of a non-royal family, relinquishes all his royal position to the throne of Denmark for himself, his wife and their heirs.

## Prince Weds Commoner

New York.—Miss Margaret Green, daughter of the late Mr. and Mrs. James O. Green, New York, became the bride of Prince Vique, of Denmark, on June 16. The Prince, by marrying a member of a non-royal family, relinquishes all his royal position to the throne of Denmark for himself, his wife and their heirs.

## Bandits Grab a Million

Chicago.—Train robbers riding in four automobiles held up the Chicago Milwaukee and St. Paul mail train at Hammond, 32 miles from Chicago, on October 23 last, and secured a million dollars in cash and currency from the Chicago Federal Reserve Bank valued at a million dollars.

## Famous Bandit Taken

Winnipeg.—Bill Nihilnik, bandit gunman and notorious jail-breaker, who made a sensational escape from the Stony Mountain penitentiary on October 23 last, has been arrested in California, and is being held for identification, according to a telegram received by Warden McElroy of the penitentiary.

## Calgary Grain Inspections

Calgary.—More than eight hundred bushels of grain arrived in Calgary on June 11th for inspection. This, according to George Hill, grain inspection officer, was of exceptionally high grade, the bulk of the wheat being No. 1 Northern.

## Want French Troops Removed

Geneva.—Germany has protested to the League of Nations against the presence of French troops in the Saar Valley. The German ambassador in Paris, France was given by the treaty of Versailles the exclusive rights to coal-mines exploitation for 15 years.

## AUDIT WOULD HAVE SAVED LOSS TO DEPOSITORS

Ottawa.—Judge McKewen's report on the Home Bank was tabled in the House of Commons. He finds that if an effective audit had been made in 1916 or 1918 the result would have been either liquidation immediately following the audit, or amalgamation with another bank. No specific recommendation in regard to the reimbursement of depositors is contained in the report.

Referring to the question what the effect of the audit would have been upon the position of the present depositors, the report reads that:

(1) If made in 1916 the present depositors would have suffered no loss.

(2) If made in 1918 "I do not think any loss would have fallen upon them."

Referring to this period, Judge McKewen takes the ground that the condition of the bank as revealed by the investigation made was such as to justify an investigation, under the powers conferred upon the minister of finance, under section 56 A of the Bank Act.

The report recounts the steps taken by the minister of finance at the three steps of the investigation, and in reply to the question what steps could have been taken by the government to save the situation, says:

"The only step that the government could have taken to save the situation would have been to make a thorough investigation into the bank's affairs, which would have resulted:

(1) In forcing the liquidation of the bank, or

(2) Enforcing such its amalgamation with another bank."

The report says that there was no evidence of representations of any kind having been made to the government concerning the Home Bank subsequent to 1915.

## Postal Workers Have Sent Protests to Ottawa

Toronto.—Officials of the postal federation announced that protests have been wired to Ottawa against the new wage scale for postal employees, which is said to be a great disappointment to many members of the service.

It was stated by some of the officials that it would take a few days to ascertain the views of the various branches of the service throughout the Dominion and until news had been received from outside points little could be done. The opinion was expressed that the new schedule would be rejected as totally inadequate and that concerted action would be taken to bring pressure to bear on the government to increase the rates to the minimum demanded by the employees in their ultimatum presented some months ago.

## Guilty Of Manslaughter

Woman On Trial For Her Life Has Charge Reduced

Winnipeg.—The jury in the trial of Mrs. Katie Kadestul, charged with killing her husband at his home near Telling, Man., on March 9 last, reduced the charge to manslaughter in a verdict of "guilty of manslaughter" after 45 minutes' deliberation.

The husband and her children, according to evidence produced at the trial, had been badly treated by her husband, and according to her confession the police, he had often threatened to kill her. Kadestul died in hospital from the effects of a gunshot wound. The woman, in her confession, admitted striking him with an axe as he lay asleep.

The two children of the accused told the jury their mother had been kind to them, whereas their father had been cruel.

## Collects Bounty On Monster Timber Wolf

Claimed to Be Largest Ever Trapped in Northern Ontario

Port William, Ont.—Standing as high as a St. Bernard dog, and measuring 8 feet 6 inches from tip to tip, a timber wolf, claimed to be the largest ever trapped in Northern Ontario, was being brought home by deer hunter, of Hildburgh, north of Port William.

Caught last in a trap, which was twisted into scrap by a dead desperate battle, the wolf was killed with a rifle bullet. Hildburgh collected a \$100 bounty.

## Wireless For Herschel Island

Winnipeg Engineer Has Commission From Federal Government To Erect Station

Winnipeg.—H. A. Young, a 1924 graduate in engineering from the University of Manitoba, has been granted a commission to erect a Federal Government wireless station at Herschel Island, according to word received here.

The young engineer, it is understood, will shortly leave for the north, and is expected to remain in the north country for several years. The proposed station will connect the frontier island with civilization. Other strategic points of the northwest territory.

## Destroy Sea Lions

Vancouver.—Twenty-five hundred sea lions have been destroyed by the Dominion Government patrol boats during the last two weeks, north of Vancouver Island. The sea lions prey upon the salmon and other valuable fish, destroying large numbers of them. The boats are equipped with guns and rifles. The crew worked along the productive salmon areas in the vicinity of the Virgin Rocks with great success.

# Government System Proposed To Secure Correct Information As To Agricultural Conditions

During the course of the current month the Dominion and Provincial Governments of Canada will proceed with their joint annual enumeration of the areas sown to wheat crops and the numbers of farm livestock.

In all the provinces the returns will be collected through the rural schools, except in Prince Edward Island and British Columbia, where they will be sent through the mails.

The present system has now been usually in force throughout Canada since 1915, and at an Interprovincial Conference on Agricultural Statistics, held in Ottawa on January 23-25, 1924, the existing plans were endorsed, with the understanding that the system should be maintained during the present year and until such time as it may prove possible to evolve better.

At the conference referred to, certain improvements were effected in the cardboard schedule issued for farmers to fill up, and an agreement between Dominion and Provincial Governments was made an earnest appeal to all farmers to give the information required, using the following seven special reasons why they should do so: (1) The statistics are collected and published primarily in the farmer's own interest; (2) They are his protection against misleading reports by speculators interested in controlling or manipulating prices; (3) They give him information which determines prices, and he receives fair play all round; (4) They enable transportation companies to judge of the volume of crop estimates, and make adequate and timely arrangements for its movement; (5) Bankers require accurate information for the extension of credit facilities; (6) Manufacturers, wholesalers and retail merchants and others require knowledge of the conditions for the establishment of profitable local enterprises which rest favorably upon the farming industry; (7) No one can be a well-informed house or crop estimator, but farmers can help to ensure the accuracy of the government estimates by giving the schedule required; the larger the number of returns, the greater will be the value of the estimates based thereon; (8) Further pointed out that the completed schedule will be treated as absolutely confidential, and no individual returns will be divulged; (9) The information will be used in any way for taxation purposes or for the imposition of any other liability.

In most branches of national effort, the necessity for accurate statistics is more and more apparent. When it is considered that Canada is now one of the world's leading wheat-growing and exporting countries, and that the prices received by the growers are determined by world conditions of supply and demand, farmers too should realize the importance of their publication of accurate information depends largely the welfare of the great agricultural industry as a whole and consequently the interest of each individual concerned in it.

If any farmer in this district should not receive the card sent to him through the rural school or otherwise by the middle of June, immediate application for it should be made either to the Public School teacher of the School District in which he resides, the Provincial Department of Agriculture at the capital of his province, or the Dominion Statistician at Ottawa.

## World's Good Wheat

**Record Harvest in 1923 But Farmers Were Disappointing to Prices**

Although in 1923 the Dominion again reaped the most abundant harvest on record, the returns to the Canadian farmer were disappointing," said E. H. Godfrey, head of the agricultural statistics division of the Bureau of Statistics, Ottawa, in a paper read on his behalf before the Farmers' Club at London.

The paper was a study of costs of production on Canadian farm and convenience of produce to English ports.

"But this disappointment," Mr. Godfrey continued, "was largely to the general conditions of the wheat crop throughout the world which had the effect of reducing the price. This is a rare occurrence and we may look for a rise in the price when world conditions of wheat revert to the normal."

Dealing with fresh outlets for Canada, Mr. Godfrey pointed out that the Panama Canal is likely to have an important influence in shortening the land haul from a large part of Western Canada. He also indicated that the Hudson Bay route has received the approval of successive governments.

"The United States," he added, "has apparently reached the limit of wheat production, while in Canada, where the vast areas of land still await the plough, agricultural production must continue annually to increase."

## Black Stem Rust

**Farmers of America Worried On Canada As War of Battering**

A warning that black stem rust is now abundant on common barley in the United States, and that it is feared that the whole will shortly be carrying this rust to growing cereal crops was broadcast by the conference for the prevention of grain rust, an organization representing the agricultural interests of thirteen Middle Western States. Immediate eradication of all common barley bushes was urged as an effective means of reducing rust losses.

After the spread of infection from the barley to grain gets under way, no man power can halt the progress of the rust. Plant disease experts declare. The statement adds that black stem rust causes an average loss of growing grain of 50 to 75 per cent of grain per year in the north central states and insists that this huge danger can be reduced to negligible proportions by destroying the common barley, on which rust gets its start in the spring.

## Reputation Never Higher

**How Canadian Wheat Stands in the Markets of the World**

In a recent statement before the Royal Grain Inquiry Commission at Winnipeg, James A. Richardson, president of the Canadian Wheat Board, Ltd., and also president of the Winnipeg Grain Exchange, declared that the reputation of Canadian wheat on the world's market was never at any time in our history higher than it is today.

Mr. Richardson quoted a letter from Charles Y. Hayward, of Proctor, Garret & Marston, of Liverpool, who were large traders, in which he stated that "your wheat this year is certainly of a very high quality, and the Dominion grade, as usual, is to my mind excellent. The price is the very greatest credit on the department that controls the grading and upon the graders who carry out the instructions given."

## Stock For Prince's Ranch

**Thousands Received At Royal Ranch in Alberta**

The S.S. Granch, which reached Canada on June 1, from Liverpool, brought over twelve horses, including eight thoroughbreds, three Clydesdales and one Durham pony, for the Prince of Wales' ranch at Pasko, near High River, Alberta. Since the birth to the British throne his 6,000-acre ranch in the Alberta foothills, he has sent over several shipments of fine embryo stock. The horses that recently arrived were selected by Percy Carville, manager of the Prince's Ranch, during his visit to England a few weeks ago. There is said to be a possibility that the Prince may pay another short visit to his ranch in June. Last fall he spent a month there.

What a wonderful old world this would be if the men who think they know it all could only prove it!

W. N. O. 1929

## Shipping Winter-Fed Cattle

**Large Shipments Being Sent East From Alberta Districts**

Large shipments of winter-fed cattle are now being forwarded from the province of Alberta for the eastern and British markets. Recently several large shipments have been made from Central and Northern Alberta, including the shipment of 250 head of cattle fed at the Edmonton stockyards by the Edmonton Feeding Company, a shipment of 14 cars from the Klekum Ranch at Jernigan, northwest of Edmonton near Grande Prairie, and a shipment of six cars from as far north as Peace Coulee. In the Peace River district. The shipment of 144 head was made from Peace Coulee by J. A. Dindler, who drove the cattle the six-day trip into St. Louis River from Peace Coulee, the cattle all being in good shape. Another interesting shipment was made recently of a small lot from the farm of J. J. Towser in the Clear Hills district, north of Peace River. These cattle were fed in the open all winter, which is further evidence of what can be done in agriculture in this district, which is more than 400 miles northwest of Edmonton.

## Value Of Mineral Output

**Huge Amount of Money Invested in Mining in Canada**

The total capital invested in the Canadian mining industry in 1922 has been reported at \$192,891,522, including the new capital invested in plant and equipment, the cost of minerals and stocks on hand at the close of the year and the actual cash represented by the balances in the accounts of mine operators, according to the Dominion Bureau of Statistics. The total value of the mineral production in the same year was reported as \$184,297,242, made up of metallics, \$126,170,291; non-metallics, \$58,642,210; structural materials and other products, \$35,234,741. In the following year, metals advanced 26 per cent, in value and there was a further increase of 14.1 per cent over the whole field.

## Seedling Finished In West

**Crop Prospects Generally Through West Are Favorable**

Wheat seedling has been completed. Roughly, there has been no work already done, and the practical question is, would the seed be used enough to justify its completion? There is considerable evidence that it would, and it is to be hoped the investment already made will be practically wasted in the little prospect of local traffic. A few million dollars will complete the laying of the rails to the city, while a minimum of handling facilities could be established at the terminus for the purpose of testing the route—Monterey Times.

## Easy To Learn

Don't teach your children to quarrel. Let them listen and they will learn.

It is believed to be virtually impossible to find a man over 60 years old who has perfect eyesight.

## FLIES FOR FISH

UPPER LEFT: THE PLANE USED BY THE BARKER-KARPIS GANG ON THE TRIP TO ST. LOUIS. LOWER: A GOOD TRAIL STREAM IN THE RIVER, RIVER DISTRICT.

The airplane as a war machine, mail carrier, fighter, map maker and general business adjunct long ago proved itself. In a new branch in a new direction, namely, as an auxiliary enabling sportsmen to reach isolated hunting and fishing grounds comfortably and quickly. Today you can hop into your plane in a distant city, after luncheon, with your war overcoat and stream for two or three hundred miles, get your motor, trout or trout, and land back at home in time to show your trophy to the gang.

## Geologists Seeking Oil

**Field Will Include Alberta and Southern Saskatchewan**

Two parties of geologists, representing the Geological Survey of Canada, in charge of Dr. M. Y. Williams of the University of Toronto, are making intensive surveys of oil and gas through Southern and Central Alberta and Southwestern Saskatchewan. Dr. Williams worked here last year, later making optimistic reports of the region. He said, in an interview that he had for oil and gas to be found on the Rogers Imperial field, the center of which Dr. Williams thinks may prove to be the largest gas field in the world. He expects oil to be found also, he said, but at a deep level. Dr. Williams said he was anxious to use the Mowbray No. 1 well and the Franklin well, both near Coles, completed.

Considerable drilling at Wainwright might be expected this summer, he said. A party of geologists under Dr. Hume will make surveys there.

Speaking of the Rogers Imperial field, Dr. Williams said, "It was a most important discovery, opening up an entirely new field."

## Appreciates Racial Problem Of America

**Japanese Admiral Says War With United States Unlikely**

"Japan will not go to war with the United States over the exclusion differences. Those two countries would be foolish to fight over such a thing. After all, the United States has a big racial problem, which Japan has not. Japan is one united nation."

This was the opinion expressed by Admiral Hideo Takeda, who retired from the navy in 1914 and is now chairman of the board of directors of a large shipbuilding and electrical appliance company in Tokyo. The admiral spent six weeks in the United States, and sailed for home on the Canadian Pacific S.S. Empress of Asia. He was on private business only, he said.

## Finish the H. B. Railway

**Can Show Good Reasons Why Work Should Be Completed**

Roughly, there has been no work already done, and the practical question is, would the road be used enough to justify its completion? There is considerable evidence that it would, and it is to be hoped the investment already made will be practically wasted in the little prospect of local traffic. A few million dollars will complete the laying of the rails to the city, while a minimum of handling facilities could be established at the terminus for the purpose of testing the route—Monterey Times.

## Easy To Learn

Don't teach your children to quarrel. Let them listen and they will learn.

It is believed to be virtually impossible to find a man over 60 years old who has perfect eyesight.

# Belief Is Entertained That Climate Of Western Canada Is Undergoing A Change

## Wealth of the Dominion

**Per Capita Wealth of Prairie Provinces Highest in Canada**

Canada's national wealth in 1923 was \$23,095,000,000, according to a report issued by the Dominion Bureau of Statistics which has concluded a survey of the tangible wealth of the Dominion in that year by the latest method.

In the tabulation, agricultural wealth comes first with \$7,921,871,126, nearly 26 per cent of the total, and about \$908 per head of population. Of the provinces, Ontario comes first with an estimated aggregate wealth of \$7,358,000,000, which is 23 per cent of the total wealth.

Quebec comes next with \$5,511,819,967. Saskatchewan is estimated at \$2,841,642,000, Alberta at \$1,950,078,000, Manitoba at \$1,650,082,000, British Columbia at \$1,265,398,000, Nova Scotia at \$1,027,097,886, New Brunswick at \$1,027,097,886, Prince Edward Island at \$1,027,097,886, and the Yukon at \$1,027,097,886.

While Ontario led in absolute wealth, the western provinces came first in per capita wealth. The Yukon leads with \$4,095; Saskatchewan with \$2,757; Alberta, \$2,317; Manitoba, \$2,205; British Columbia, \$2,041; Ontario, \$2,507; Quebec, \$2,547; New Brunswick, \$1,514; Nova Scotia, \$1,437; Prince Edward Island, \$1,233.

For the whole Dominion, the aggregate per capita wealth was \$225. Next to agricultural wealth and urban real property, Canada's investments in steam railways and their equipment is the highest factor, being estimated at \$2,120,218,000, the value of urban property, based on the assessments at \$1,272,000,000 (including machinery, stock on hand, etc.) and household furnishings, clothing, automobiles, etc., at \$1,141,000,000. The value of the Dominion's banks, and estimated for public buildings, was \$200,000,000.

Value of Canada's mines was estimated at \$59,514,000.

## Rats Drive Birds From Island

Many thousands of sea birds who make their homes in the spring on the island of Alsea Craig in the Clyde have been driven from their nests by armies of rats, which have overrun the island. As far as the Craig is concerned, the rats are the only birds who have become extinct. The rats carry off the eggs from the nests and kill the young birds. Inhabitants say the night is made hideous by their squeaking as they fight for food.

No power, no earth, no wind, no rain, can make a man strong with out his own consent.

A man easily wrapped up in himself carries a small package.

## One Farm Woman's Record

**Answer to Questionnaire Shows Work Done in 29 Years**

In 29 years one farmer's wife has served 235,224 meals, told a farm magazine, which recently sent out a questionnaire on "How much is a woman worth?"

Other things the one woman has done include:

Made 23,230 loaves of bread.  
Baked 5,230 cakes and 7,569 pies.  
Canined 1,530 quarts of fruit.  
Baked 7,660 chickens.  
Churned 5,468 pounds of butter.  
Put in 24,648 hours sweeping, washing and scrubbing.

The woman closed her letter with this:

"I estimate the worth of my labor conservatively at \$114,458.50 some of which I never collected. But I still love my husband and children, and wouldn't mind starting all over again."

## Cost of Forests

Many private owners cannot afford to raise forests because there is no income from growing timber. Land suitable only for timber growing is a waste of money, and must be sold during the growing period. Rocky lands, lands too poor to cultivate, steep hillsides and swamps might thus be brought into cultivation. Owners' hands might become suitable investments for life insurance companies and others willing to wait a long time for a new crop to grow. The Chicago Tribune.

## Why He Was Bent

"Well, Sandy," said the lady, "you are getting very bent. Who don't you stand up straight like me, boy?"

"Oh, ma, de, I've got that field 'o' corn over there?"

"Ido," returned the lady.

"Ido," said the lady, "the field 'o' corn over there, and the empty ones stand up."

## Egypt Feared Cat Sorcery

The belief that cats were connected with sorcery and were the protectors of magic was so strong in Egypt that cats were said to have originated in Egypt.

## WORLD HAPPENINGS BRIEFLY TOLD

The constituent assembly of Mesopotamia refused to ratify the proposed Anglo-Iraq treaty.

Dr. G. A. Gordon, British Government surgeon, died from injuries received in an automobile accident.

Control of Eskimo residents of Canada is placed under a bill given first reading in the House of Commons.

Sir Mortimer Durand, 74, British Ambassador at Washington, 1945-1946, is dead.

The Anglo-Italian experts have completed their work of defining a new Jubaland frontier. A convention will be signed shortly.

It is announced that the United States Government will close its books for this fiscal year with a surplus of between \$250,000,000 and \$400,000,000.

Plans for construction of between 60 and 70 grain elevators in Manitoba, Saskatchewan and Alberta during the present summer have been completed by the United Grain Growers' Company, Limited.

Following a meeting at Winnipeg of the executive committee of the On-to-the-Bay Association, it was declared by members that there had been a decided improvement in prospects for early completion of the Hudson's Bay Railway.

More than 200 students, four of whom attended in the original year of 1874, heard President J. B. Heywood give his address of welcome on June 9 in connection with the fifty-first anniversary celebration of the founding of Ontario Agricultural College, Guelph.

**Sentenced To Death**  
**No Appeal Possible**

The death warrant is passed out every time a corn is treated with Putnam's Corn Extractor. It means the end of the corn. Putnam's lifts and cures corn, root and branch, and never fails. Refuse any substitute for Putnam's. See everywhere.

**Gifts Of Chinese Generals**  
Helm-Ko-wu, Chinese military leader, has presented each of his soldiers with a handkerchief inscribed with eight characters reminding them of their meritorious service. Other generals are distributing wash cloths and tooth brushes.

Hypnotism is scientifically studied in one of the French medical colleges.

## Working On Beam System Of Wireless

Marconi Will Shortly Conduct Experiments In Long Distance Radio-Telephony

The beam system was not used in the experiment recently conducted from Cornwall, in which signal Marconi was enabled to speak by radio with Australia. Mr. Marconi said the results of beam transmission which he intended to make the material for trans-Atlantic experiments in the future, undoubtedly would satisfactorily prove its availability for high speed telephony for which he said his company was prepared to build large stations in various parts of the world. The beam system is the best that can be constructed within an area as narrow as five degrees and possibly less, and that by its use he will be able to obtain with power of only one tenth of a kilowatt as efficient transmission with twenty kilowatts, which was the power used in the speech to Australia. He added that radio telephone communication between Europe and America is "coming soon."

## Millions From Tourists

Great Importance of the Tourist Traffic of the Dominion Is Shown

Tourists spent \$136,000,000 in Canada last year, and of this over \$26,000,000 was spent in the province of British Columbia, according to an estimate made by the Dominion Parks Branch at the Canadian Government, Department of the Interior, an organization which keeps close tabs on the movement of tourist traffic in Canada.

The traffic includes the railways, but not less than 1,662,000 automobiles, carrying an average of four passengers each, were registered as having passed into Canada on holiday travel during 1923.

The importance of this tourist traffic to the Dominion is seen in the fact that the amount spent by these travellers amounts to about 85 per cent of the annual return on the securities which have been bought in Canada by United States investors.

**Wheat In The Northland**  
Herman Trele, who took second place with his Marquis wheat at the Chicago International Exposition last year, and whose farm is at Lake Saskatoon west of Grande Prairie, Alberta, and 400 miles northwest of Edmonton, reports that on May 21 his new wheat stood nine inches above ground. He sent a sample to W. J. Stephen, Field Crop Commissioner, of the Alberta Government.

## You Can Stand on this Wash Board

Our **SMP Pearl Ware** Wash Board is so strong, tough and durable that a full-grown man or woman can stand on it without doing the rubbing surface or any part of it the least harm! The enamelled surface won't chip, flake or peel off. Think of the wear there is in such a wash board! There is the same wearing qualities in all articles in **SMP Pearl Ware**. Try out the wash board and be convinced.

## Professor Advances New Theory Says Earthworms Have Memory and Can Be Trained

Earthworms have memory and may be trained, it has been shown by Professor Heck, of the University of Prague, as the result of experiments with a collection of about five hundred worms. The worms were introduced into a passage shaped like a capital T and carved from a block of wood which was covered with a glass plate so that the movements of the little creatures might be observed. When they came to the junction about half of them turned one way and half the other. Then the apparatus was so arranged that those worms that took the left-hand passage received a mild but presumably disagreeable electric shock. At first the worms did not know just what to make of all this, but after they had been through the experience about two hundred times, they nearly all took the right-hand turn. When the electrodes were then moved to the right-hand passage, the worms learned to shift to the other passage after only sixty-five trials, evidently showing some memory of the more agreeable experience. In the human case, earthworms have no brains; their nervous systems consist of a series of 10 ganglia or nerve centres, on the under side of the worms and connected with each other by nerve fibres. If the worms were cut in two, the fragments still showed the ability to distinguish between the safe and the unpleasant road to travel, indicating that the earthworm remembers in every one of its ganglia, and that it is able to learn and profit by experience.

## Straight Talk On Danger Of Colds

Let your cold gain headway, and you can't keep it from running rampant.

Catsarrh never stays in the lungs alone. It consumes the throat.

Drive colds and catsarrh right out of your system while you have the chance.

Easily done by inhaling CATARRH OZONE, which instantly reaches the true source of the trouble and gets rid of it.

Catsarrh is the living germ of chronic colds.

CATARRHOZONE is full of healing balms and essences, and is able to patch up the sore spots and remove that irritating itching from the nose and throat.

Hawking and spitting cease, because CATARRH OZONE reaches the nostrils are cleared, headache is relieved, and the throat is soothed.

Get CATARRHOZONE today! Each bottle costs \$1.00, or 50¢ in bulk. Sold by all druggists or by mail from The Catarrhonne Co., Montreal.

**Customs In Baking**  
The Arab woman digs a pit in the sand and builds a hot fire in it. Then she takes away the embers and places her dough on the hot sides. When the bread is done she picks it out of a pile of loaves. The delicious crisp Persian bread which is bought in enormous flat pan-cake-like sheets some 20 inches long is prepared in a number of ways. The Eccardian woman follows a very interesting old custom. She bakes bread in the shape of persons and animals for All Saints' Day.

**BABY'S OWN TABLETS**  
**ALWAYS KEPT ON HAND**

Mr. David Gagne, St. George, Que., writes: "I have used Baby's Own Tablets for my three little ones and have found them such a excellent medicine that I always keep them on hand and would strongly advise all other mothers to do the same thing."

The Tablets are a mild but thorough laxative which quickly relieves constipation and indigestion; break up colds and simple fever and promote healthy refreshing sleep which makes the baby thrive. They are valued by all medicine dealers and are sold in 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

**Bank Savings Increase**  
An increase of approximately nine million in total savings deposits in Canadian banks during the month of April is shown by the statement issued through the department of finance. Demand deposits also show an increase of over ten millions during the month.

Many people are almost crippled by corns. But this is needless suffering which can be speedily ended with Holloway's Corn Remover.

In English Class  
Teacher: "I have sent That's wrong, isn't it?"  
Pupil: "Yes, ma'am."  
Teacher: "Why is it wrong?"  
Pupil: "Because you said 'sent'."

**Exports Show Increase**  
Canadian farm products shipped to the United States during the seven months ended April, 1924, totalled \$2,235,502, as against \$2,107,081 during the corresponding seven months two years ago.

**Minard's Liniment For Falling Out of Hair**

## Authorities Advise This

To realize the dream that is in every woman's heart, to keep the youth that every woman wants.

Turn for a while from the elaborate treatments and methods. Try this simple but correct way.

Then—old skin is dry—apply a little cold cream. That is all. Skin so cared for is dry—only by cosmetics, by wind and sun, or by dirt.

**The simple, correct way**  
You cannot find a more effective beauty treatment. Because

Wash thoroughly with Palmolive Soap—each night before retiring. Rub the creamy, foamy lather well into the tiny pores. Rinse and repeat the washing. Then rise again.

## A secret so simple many overlook it

Yet millions of women keep youthful loveliness this way

Palmolive Soap is blended of rare palm and olive oils—luscious for mild but thorough cleansing qualities since the days of Cleopatra. And it is inexpensive.

Just be sure to get Palmolive—which is never sold unwrapped. All dealers have it. Then for one week try this simple treatment. To your delight, results will be noticeable even in that short time!

The cost is so little that you can well use Palmolive for the bath, too.

**The simple, correct way**

## Farmers and the Income Tax

Eastern Paper Overlooks a Very Important Fact in Offering Criticism

The Ottawa Journal is increased because the western farmers do not pay more money to the government in income taxes. A return tabled in the House of Commons shows that for the fiscal year of 1923-24 a total of \$5,721,000 was paid by the people of Canada in income taxes and of this the farmers of Canada paid but \$400,000, or less than one per cent. of the total.

"It is when people in the east contemplate such things as these," says the Journal, "that they grow a little weary of any western claim of 'national discrimination'."

Now, as we understand it, the people who pay income taxes are those who have income above a certain sum.

If you haven't an income you do not pay income tax; if you are lucky enough to have an income you contribute part of it to the government.

The income tax law is very exact. It is claimed by the government that it is thoroughly enforced. Therefore, if the farmers of Canada, both east and west, are not paying income taxes it is because they haven't the income.

Therefore, the Journal is railing at the farmers of Canada because they are not earning enough money—the tax-beggar. Why don't they make money like some of the corporations do? Why don't they go to the farm market?

The Journal might make a few inquiries among the farmers of Eastern Canada as to why they are not paying income taxes down there. If it consulted the records it might find that on a percentage basis the farmers of Western Canada are paying more to come tax than the farmers of Eastern Canada.

Perhaps the Journal will suggest to the farmers of Ontario that they better hustle into mixed farming and save themselves and the country—Manitoba Free Press.

**Something In It**  
She—What's in a name? as the poet says.

He—Well, if you take mine, you might get a good home out of it.

Many a man who has the courage of his convictions makes a fool of himself.

**Sore Heal Quickly**—If you're a persistent sore that refuses to heal? Try Dr. Thayer's Electric Oil in the dressing. It will stop drawing, carry away the proud flesh, draw out the pus and prepare a clean way for the new skin. It is a recognized healing ointment, and millions of people can certify that it healed where properly applied.

"Grave wanted (secondhand) in Brighton Cemetery; hold two of one. Good price given," runs an advertisement in a Fulham newspaper.

**Minard's Liniment for Aches and Pains**

The only difference between black pepper and white pepper is that the former has not been stripped of the outer skin of the berry before grinding.

## SUNDAY SCHOOL LESSON

JUNE 22

REFORMS UNDER EZRA AND NEMEHIAH

Golden Text.—Return unto me, and I will return unto you, saith Jehovah our God.

Lesson.—Ezra, Chapters 7 to 10; Nehemiah, Chapters 5 and 12.

Devotional Reading.—Isaiah 14:1-3.

**The Text Explained and Illumined**  
The Reading of the Law by Ezra, verses 1-10.

The first day of the seventh month is the day which from the time of Alexander the Great onward has been celebrated by the Jews as their New Year's Day. On this day occurred the festival known as the Feast of Trumpets, which was observed with special ritual, see Lev. 23:24-25.

In the 45 B.C., on the day of the Feast of Trumpets, when the water gate and Ezra the priest and the Levites came to the temple of the Law of Moses. In Ezra the title of the scroll came to mean the man of the book. It is evident that the scroll was the nearest original of the clergy of later times (Owen Stanley).

Exactly to what the phrase, the Book of the Law, refers is a disputed question among scholars. The Pentateuch, some believe; the legislative portions only of the Pentateuch, others maintain.

Ezra stood upon a wooden platform above the people, and was aided by the Levites, who gave the sense so that the people understood the reading. Evidently Ezra read by sentence, and briefly expounded it, and then the Levites made his explanation clear to the people. Men, women and children were present, and listened attentively to the reading from early morning until midday.

On account of the heat they had their customary rest during the noon hour, to the reading the people responded with Amen, Amen (So be it), with a lifting up of the hands, evidently with the palms upward in supplication for the divine blessing, and worshipped the Father with their faces to the ground. "We should learn the lesson taught by the waving crowd, prone on their faces and blessing God for His Word. Such reverent attitude may ever precede reading of it, if we are to read aright" (Maclean).

Miller's Worm Powders are complete in themselves. They not

## Mirror and the District

Blake Downswell is away on a two weeks' holiday in Calgary.

A. Shargelo and Chris. Kubik motored to Edmonton on Tuesday.

Work is now going ahead on the tennis court, and games will soon be played.

Miss F. Thornburgh, of Iowa City, Iowa, is visiting with her cousin, Mrs. J. C. Simpson.

Rust Brothers, of Pleasant Valley, were calling on friends in the Mirror district last Saturday.

Harold Oldring, of the Royal Bank staff is spending a two weeks' vacation with relatives in Calgary.

Mrs. Jas. A. Steele and daughter, Margaret, of Edmonton, are visiting with Mr. and Mrs. Jar. Steele, Mirror.

Mr. and Mrs. J. W. Spicer and grandson, Jack, left last Friday for a couple of months' holiday with friends and relatives at Preston and Hanover in Ontario.

Dr. R. A. McCormack, Dentist, will be at the Imperial hotel, Mirror, Monday, June 23, Tuesday, the 24th; and at Albx. Wednesday, June 25th, to Saturday, June 28th.

## Card of Thanks

I take this opportunity to thank all my friends and neighbors who helped to extinguish the fire at my barn last Wednesday morning, and assure them of my sincere appreciation. If it had not been for their quick response and perseverance, the building would have been a complete loss.

G. J. ESTILL.

## Hickling Board Meeting

Next Thursday afternoon at the home of Mrs. W. Eccleshall at 2 o'clock there will be a meeting of the Ladies' Aid of the Hickling district. At 3:30 there will be a joint meeting of the Church Board and the Ladies' Aid. All members are urgently requested to be present.

Visit the Experimental Station, Lacombe, on July 3rd, and see the forage crops being grown for the large beef and dairy herds. The legumes and grasses can be seen to advantage at this time and the methods of producing silage crops can be studied. Come early and bring your lunch. All are welcome.

F. H. Reed, Superintendent.
